SimonT Hockey Simulator

Ratings Information for Version 2

In the version 2, the STHS has a lot of modification regarding rating; new ratings and new fields were introduced for players CSV. Also, one of the big modifications is that the STHS doesn't accept CSV files to update rating. The STHS need a rating file. A rating file can be created by the *STHS Utility V2*. *The STHS Utility V2* allows you import all type of CSV files in the history of the STHS and add some information like the creator name, email, rating year and comment. The usage of rating files that cannot be modified once they are created will help to resolved numerous of error importing CSV in the STHS version 1.

Stuff to know :
The use of the character " in a CSV file will cause a bug where no player or coach is import correctly. You need to put 0 to stats 15 and 16 to goalie so they are import correctly. The positions numbers are:

- 1 = C
- 2 = LW
- 3 = LW & C
- 4 = RW
- 5 = RW & C
- 6 = RW & LW
- 7 = RW & C & LW
- 8 = D
- 9 = D & C
- 10 = D & LW
- 11 = D & LW & C
- 12 = D & RW
- 13 = D & RW & C
- 14 = D & RW & LW
- 15 = D & RW & LW & C
- 16 = G

The Stats for Players are: (Modified in V2)

#	Stats	Base yourself on ** to create ratings.

For referees, the demo CSV file is very easy to understand.

When you are finished, you send it to via email and I'll publish it on the STHS website with full credit.

If you have any question, you can send me an email or private message on the forum,

Thank you.
